B18 - The Great Crash Course me Docker Kubernetes ho jaega mast..

Terraform se kubernetes ka landing zone bana dia..	Monday se 7 - 9 PM
Multi Stage Docker file with pipeline with SAST Integration parameterized way me	
Manifest File K8s ka Deployment, Service, Ingress likh ke helm setup karna	
Azure DevOps ke through CD karna... Problem ko feel karna..	
ArgoCD setup karna and ArgoCD implement karna..	

1. helm create aloo-chat
2. templates folder me deployment.yaml and service.yaml daldo..
3. helm install using ChatGPT
4. prepare helm chart and values file
5. helm install axion-dev . -f values-dev.yaml
6. helm upgrade --install myapp . -f values-dev.yaml -n dev
