

- Result na hone ka matlab ye nahi ki aap kamjor ho..
- Only Join if
1. Switch nahi kar pae abhi tak..
2. Chanakya Panel wale group me ho..
- Aane wale 4-5 saal me full stack ban na pdega..
- Infra + Application + Sab kuch..

- Job hmesha basics bolke hoga, Advanced not required
1. Azure Migration
- 1.1 OnPrem to Any Cloud
- 1.2 One cloud to another cloud
- 1.3 One Cloud -> Monolithic to Microservice
- 1.4 Cloud to OnPrem

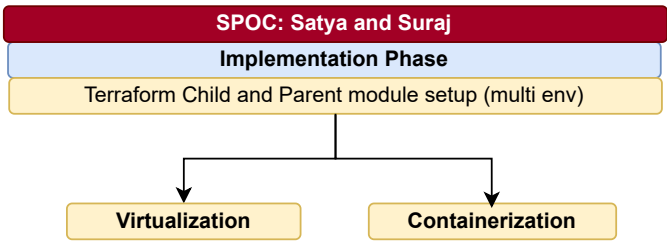

- 1.1 OnPrem to Any Cloud
- Justify Cost, Security, compliances, Time... Why we are going to Cloud?
- Phase 1: Discovery and assessment
- Application language?(java, Dotnet, Rust, Go etc..)
- Which Database (MySQL, PostgreSQL, MongoDB etc..)
- How much Storage?, How many users?
- Downtime allowed or not?

- Application Based Classification
1. Lift and Shift
- VM Based App -> Azure VM
2. Modernization
- microservices -> AKS
3. Database migration
4. File Share Migration
5. Server Migration -> Azure Migrate
6. Simple app to Paas Services or Serverless
7. Greenfield deployment (ek dum tatatak new application)

1. Hierarchy Setup
- Simple
- Hub and Spoke
2. Governance and Compliance
- Azure Policy
- Builtin and Custom policies and Initiatives
3. Identity and Access Management (IAM)
- Entra ID Setup, Users, groups
- AD Sync, On Prem AD Setup
- RBAC, MFA, PIM Role
4. Networking Setup
- Hub and Spoke Networking Model
- Hub Vnets, Spoke Vnets, Vnet peering
- VPN Gateway -> Site2Site, Express Route
- Application Gateway, Frontdoor, LoadBalancers, Traffic Managers
5. Compute Workload
- VM, VMSS, Web App, App Services, Azure Functions
- ACS, AKS
6. Database and Storage Setup
- PostgreSQL, SQL Server, MySQL
7. Security Architecture
- Zero Trust
- Application Gateway with WAF, Firewalls
- NSG, ASG
- Bastion, KeyVault, SSL
- Sentinel, Defender
- Private Endpoint, managed identity
7. Monitoring
- Log Analytics Workspaces
- Application Insights
- Azure Monitor
- Prometheus/Grafana
8. Backup
- VM Backup
- DB backup
- Storage Account Backup
9. Disaster Recovery
- Storage Account Backup
- RTO/ RPO
- Active/Active , Active/Passive
- Failover Testing
10. Cost Optimization
- Identify oversized and reduce
- Shutdown schedule
- Right Sizing
- Storage Hot and Cool decisions

- Mishra Ji, Kapil Ji and Praveen Ji
- Next 5 days me ye sab cover kar denge..
- Ye sab components use karke HLD banega
- Complete Azure Landing Zone Design
- Azure Migration Architecture
- DR Architecture Diagram

- SPOC: Satya and Suraj
- Branching Strategy - (Trunk Based)
- Azure Repo, Azure Pipeline, GitHub Actions, Terratest, SAST
- After 10 Days, Everyday 2 Hours Mock
