Infra Set using Terraform

https://github.com/devopsinsiders/microservice-infra-b17

Application Deployment using Argocd And Azure Pipelines

Domain Mapping and Application Gateway Ingress Controller setup

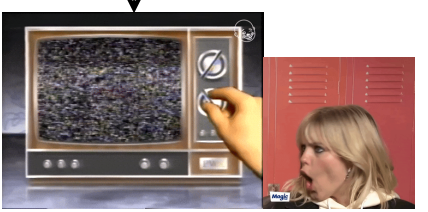

Observability

Prometheus Database

DVR/NVR - harddisk Storage

PromQL - To Filter Data

Install prometheus using helm

Install grafana using helm

Connectivity from Prometheus to Grafana

PromQL generating dashboarding and alert to Grafana

manifest -> kubectl apply

helm chart -> helm install

prometheus + grafana

Home Work:
Production ke saath prometheus grafana and kya kya alerts set krte hai?

Feel Logs and Metrics kya hota hai ?
Kubernetes me production ke lie kya kya alerts set krte hai?
PromQL ke baare me thoda sa feel..
