

Homework
1. Koi pod ko agar ek specific node pr chalana hai toh kaise chalaenge (Node Selector, Taint Tolerations, Pod Affinity Anti Affinity)
2. How to Upgrade Kubernetes version?
3. How to design a production grade kubernetes infrastructure(Highly Available, MultiRegion, better security, backup, cost, goverance) - HPA , VPA, Cluster AutoScaler, Mutiple Node pool (system and User), Monitoring
4. How to optimize kubernetes cost?
5. Networking Model for the Cluster

Write deployment.yaml, service.yaml, type loadbalancer

Requirement: Landing zone for application ie AKS
MultiStage Dockerfile
CI Pipeline Azure Devops ya GitHub Actions, with trivy sonarqube etc and push to acr
manifest files of kubernetes, deployment, service, ingress
Helm chart me convert karenge
Github Actions ya azure devops se hi CD likhenge and problems
Introduction to GitOps (ArgoCD)
Prometheus, grafana, etc.. will be deployed in cluster using helm
Service Mesh istio, KEDA, HPA, Cert manager etc..

nginx ke lie deployment.yaml smjh lete hai, service.yaml smjh lete hai and internal test krke firefox dalke feel krte hai
Application gateway ingress Controller
